Belgian accounting for Belgian people

Most of the reference Belgian accounting software although they perform well, are obsolete nowadays. The new accounting software appearing on the market were designed abroad and needed to be tweaked so they could be used in Belgium. We think it is not good enough. With our software 100% made in Belgium, **we offer an uncompromising leap into the future.**

Thanks to Silicon ioi, you will save a significant amount of time and notice a substantial increase in the quality of your work.

The expertise of a network of installers, renowned and specialized in your trade

As with any program, our software can be bought directly online. The uniqueness of it lies with the fact that it is installed, configured and adapted to your trade by experts. It are these trusted and professional experts who will help you advance in this world marked by very-fast paced technological advances.

We offer the following:

- **helpdesk support available by phone ;**
- **in-person meetings during workshops to which you will be invited ;**
- **thoughtful updates with progression plans prepared by your financial department**

A robust and reliable configuration for professionals

Because we are aware that **the virtual world has its limits**, your data will be stored as per your wishes on your site, by your installer or in Europe, in a localized data center.

Backups will be stored in a separate, clearly defined location, for maximum transparency and security. Nothing virtual.

Easy customer access, extensible to fiduciaries

Just like you, your customer enjoys a 24/7 access to the accounting system. You choose what he is allowed to do or see: limited consulting, uploading of invoices, accessing analyses targeting its trade...

Retrieving the Coded Statement of Account CODA

As an expert accountant, you can access your customers' accounts to retrieve the CODAs. Our software allow you to obtain CODAs from Belgian banks but also from **up-to-date European banks.**

Ergonomics and efficiency

No matter what you use to access your accounting: computer, tablet or smartphone, **our software interface adapts automatically to the screen for an optimized comfort of use.** Windows, Apple or Android tablets, smartphones, iPhones: all are compatible with our software.

A very comprehensive management of fixed assets

Our program allows for a very comprehensive management of fixed assets, with **fiscal annexes that meet the legal requirements**, are flexible in their use, during the fiscal year and at the time of closing. In short, it deals with the shortcomings of foreign accounting systems and systems spread over multiple legal jurisdictions. With our software, move away from MS Excel spreadsheets and access an integrated fixed assets management system that takes the Belgian fiscal specificities into account.

Payments via Isabel

We offer a secure management of payments with the one tool that Belgian banks have in common : **essential for authenticated signatures and controlled payments.**

Customization and automation

With your installer, you can manage additional screens, complete analysis and connect smart business tools, write automation scripts and present your customers with groundbreaking KPI tailored to their activities.

Complement your management toolbox with ready-to-use applications

Applications for invoicing / commercial management / stock management / manufacturing management /project management / CRM... Our Silicon Brain editor has been supplying those for a good 30 years. The extensively high level of configuration can meet the needs of SMEs as well as those of industrial firms. **See silicon-brain.com for more information.**

Expert Accountants, offer a customer support service

A module allows you to deal with customers' requests thanks to a support tickets system: the customer can track the status of his request for support online and both parties can see the relevant documents.

Specific developments, controlled prices

Our software **provides you with an integrated development tool.** Your installers expertise can handle advanced adaptation requests, with a deep level of integration. The (API) interface using the REST/JSON standard can be used by your development team.

Security first

Your data is precious. We offer a two-factor authentication for a better protection.

Cutting-edge technology accounting

Our software is developed with a 'MariaDB' database, using Python on the server and JavaScript/HTML/CSS for the customer. A reference architecture in today's world.

Integrated documents management

Simply 'drop' a document to link it to a part or click once to download scanned documents directly where they are needed: our program is designed to make your work easier and to help you save more precious time.

Improve the monitoring of your activity

Our software keeps a trace of every save and modification made, which allows you to keep track of who does what. In doing so, you can increase the quality of your processes, thanks to the monitoring of accounting activities.
